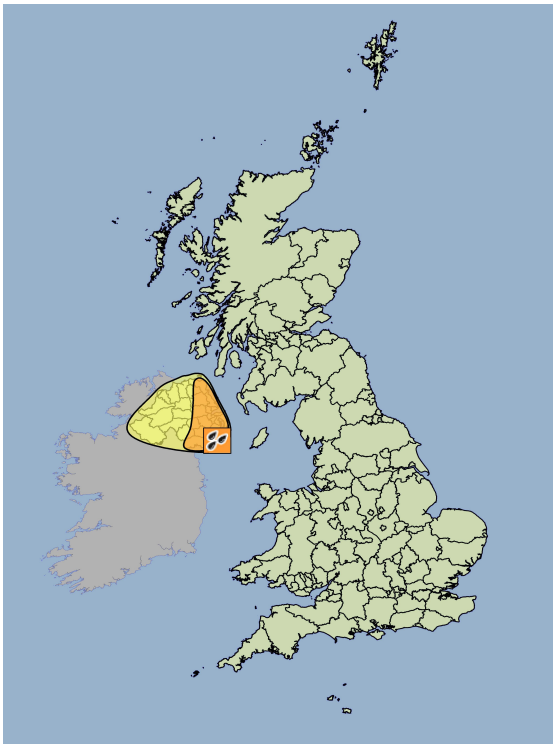
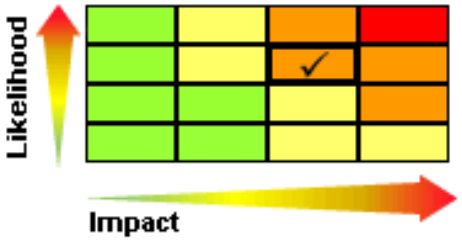
National Severe Weather Warning Service





Chief Forecasters Assessment
An active frontal system will move east across Northern Ireland during Thursday and early Friday morning. Rainfall totals will be around 20-40 mm widely, and within the Amber area in the east, 40-60 mm with peaks in excess of 80 mm over the hills. This will also include some short spells of heavy rain which could produce 20 mm within a few hours at low levels too, notably later Thursday afternoon and again early Friday morning.

The Met Office have issued an **Amber Warning** of **Rain**

Valid from **10:30 on Thu, 06th Nov 2014** until **08:00 on Fri, 07th Nov 2014**

Further bands of rain will move east across Northern Ireland during Thursday and early Friday. Some of the rain will be heavy, notably during Thursday afternoon and also for the first part of Friday in the east.

The public should be prepared for the risk of localised flooding, with the likelihood greatest in the east of Northern Ireland.

This warning has been updated to expand the Yellow area and to include an Amber area in the east.
